

ACRO-SPRING

Reach new heights on this extreme trampoline!

The Acro-Spring is the latest form of amusement perfect for corporate picnics, festivals, parties, school functions and many other events. It is a safe and distinctive alternative to the traditional moonbounce or backyard trampoline. Unlike many of today's event rentals, the Acro-Spring can be used by children and adults making it an experience for the WHOLE family!

The Acro-Spring was originally designed and patented by Olympic ski trainer, Mr. Frank Bare II, and has been a popular attraction in Europe for the last decade. This is the product of choice for those who seek the ultimate family attraction.

Your event attendees are sure to enjoy this attraction!

Safely Harnessed

Fun and safety merge in a carefully crafted amusement where each participant is secured into a 3-point harness in their own jumping station. Multiple bungee cords are attached to the harness which gives jumpers a "super boost" into the air allowing them to perform aerial maneuvers without the risks of bungee jumping. The design gives each participant their own jumping space which eliminates injuries caused by collisions with others and enhances safety.

FAMILY FUN
Mom and daughter share in the fun at a recent event.
